CARDIN ELETTRONICA SPA would like to inform the esteemed customers that owing to changes in the type of components available on the market the channel strip used to date in the modular outdoor receivers and the 2G-3G receivers series S449-S486-S504-S508-MORPHEUS will no longer be supplied. The new strip with a male type connection is not compatible with the receivers produced up until the summer of 2018. Consequently the receiver and channel strip codes have also changed:

- for the receivers we have added the letter 'N' e.g. RCQ504C1 becomes RCQ504NC1;
- for the channel strip we have added the number '1' e.g. MCCMORPHM0 becomes MCCMORPHM1.

Consult the table below for the correct pairing and the correct product numbers to order.

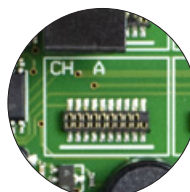

We have applied a yellow sticker to the box with multiple pieces indicating the new receivers and channel strips in production from September 2018.
